

# CHARCOAL DEODORANT

## Aluminum Free

Charcoal Deodorant that is aluminum free with effective odor control. You can feel confident that your deodorant is a safe choice for you and your family!

## Key Ingredients

- “Aluminum-based compounds are used as the active ingredients in antiperspirants. These compounds form a temporary plug within the sweat duct that stops the flow of sweat to the skin’s surface. Some research suggests that aluminum-based compounds which are applied frequently and left on the skin near the breast, may be absorbed by the skin and cause estrogen-like (hormonal) effects. Because estrogen has the ability to promote the growth of breast cancer cells, some scientists have suggested that the aluminum-based compounds in antiperspirants may contribute to the development of breast cancer.”
