CREATIVE THINGS TO DO WITH PUMPKINS

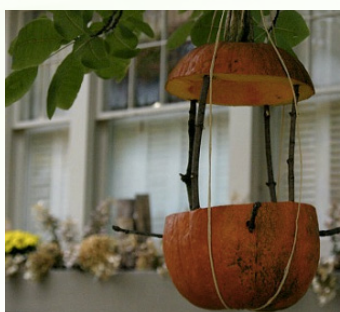

Fall Flower Pumpkin Planter

What do you get when you cut the top off of a pumpkin, scoop out the insides, and fill it with soil? A lovely fall planter, that's what! Kids love to dig in the dirt and watch things grow. Add an extra element of fun by planting in a pumpkin.

Pumpkin Seed Art

If you're looking for the perfect Halloween activity for younger kids or a classroom Halloween party, try pumpkin seed art.

Pumpkin Bird Feeder

All you have to do is cut the pumpkin in half, scoop out the innards, and hang accordingly. Add twigs for a little something extra. Your fine feathered friends will love being treated from this colorful display, and your kids will enjoy watching the birds come to call.

Dripping Crayon Pumpkin

This one is easier than it looks: just melt crayons with a blow dryer and let them drip down your pumpkin. Use caution, it still may get pretty hot. If you're concerned about little hands (or big ones), use some gloves for protection.
