

EYE FIX PRIMER

Can be used on eyelids, under eyes, and
as a spot concealer.

KEY INGREDIENTS

- Bees Wax
- Jojoba Seed Oil
- Candlila Wax

BENEFITS AND SUGGESTED USES

- Apply a thin film to clean bare lids. Smooth it on from the lashes to the brow, to the outer corners of the eye. Let it dry for approximately 30 seconds, then apply eye makeup.
- Works as an invisible shield between eyelids and eye color, so shadows, liner and powders stay put, stay fresh and color-true longer. This formula helps control creasing, streaking and fading.
- Makeup goes on more easily and blends smoothly.
