

HYDRATING BODY SPRITZER

Body Care

Refreshing body spray leaves your skin hydrated and fragrant and adds that “extra perk.”

Key Ingredients

Aloe Leaf Juice is packed with vitamins A, C, E, B1, B2, B3, B6, B12 and folic acid. It is also rich in minerals like calcium, magnesium, zinc, iron, selenium and potassium. Great for rejuvenating skin.

Witch Hazel is a natural astringent which means it has the ability to remove excess oil from skin and shrink down pores. For both men and women, witch hazel is a great follow-up to shaving. Not only will it stop bleeding from nicks or cuts, anti-inflammatory witch hazel can also work to prevent razor burn.

Benefits and Suggested Uses

Using a Hydrating Body Spritzer is an ideal way to add subtle fragrance to the body without going overboard.

Apply to pulse points in order to allow the fragrance to last longer. Points include the inside of wrists, knees and elbows, as well as neck, chest and behind the ears.

Take your hair brush and spray it slightly. Use the brush to comb your hair in order to make it have a slight smell similar to that of the Hydrating Body Spritzer.

Keep in the fridge for a quick cool down on a hot summer day.

Freshen linens with just a few spritzes.
