**BENEFITS AND SUGGESTED USES**

Inside your cheek is your best color. Choose 2 shades deeper or lighter for your perfect lip color.

Sheer finishes look better than matte.

A dab of gloss on the center of your bottom lip gives the appearance of a fuller pout.

Using a lip brush allows the Lip Butter to stay longer and balances color more than swiping it on. Use a brush in the morning and touch up throughout the day.

Dark colors minimize lips where lighter makes them look fuller.

Don't wear red if you have break outs or rosacea; it draws more attention to the red.

Pale colors illuminate and are great in the summer months with bright summer fashions.
